STAFF REPORTS - SUSTAINABLE ENVIRONMENT AND ECONOMY

Report No. 4.1 **2017NTH013 DA & DA 10.2017.201.1 Villa World - West Byron**
File No: **I2017/935**

17-284 Resolved:

1. That Council prepare a submission on the Development Application 2017NTH013 DA & DA 10.2017.201.1 Staged Development Application for Subdivision of Land West Byron.
2. That a Council staff member (not involved in the assessment of the Development Application in point 1) be requested to finalise a submission on behalf of Council objecting to the Development Application 2017NTH013 DA & DA 10.2017.201.1 on the following grounds:
 - a) failure to provide land owners consent from the Crown and Byron Shire Council for works within the drainage reserve lot and Council's road reserve; and
 - b) failure to provide land owners consent from private landowners for that part of the land covered by the concept proposal for subdivision of the whole of the West Byron site (number and type of lots not specified); and
 - c) insufficient information to enable an informed consideration of the location detail or truck movement (including time frames) concerning the use of fill on the site, as well as the lack of understanding of impacts of fill and resultant drainage on adjoining neighbour's properties, SEPP 14 wetlands and Belongil creek catchment area; and
 - d) insufficient information to enable an informed consideration of the traffic impacts associated with the construction activities and resultant subdivision works and development of the site; and
 - e) failure to adequately address koala impacts on site through the submission of a Koala Plan of Management for the site and its development, including dealing with potential threats to connectivity; and
 - f) failure to protect and enhance threatened species and habitat; and
 - g) failure to protect and enhance the existing wallum froglet populations, which is Council's preferred action, the result of:
 - i. the inappropriateness of the removal of key Wallum Frog habitat; and,
 - ii. lack of 50 metre buffer and linkage along drain and watercourse lines; and,
 - iii. failure to adhere to the National Recovery Plan for the Wallum Sedge Frog and other Wallum dependent frog species; and
 - h) failure to adequately address the design principles as outlined within the approved Byron Development Control Plan 2014 Chapter 8 West Byron Urban Release Area including all matters included in E8.10.
3. That the submission reference land holders and take into account concerns on the capacity of the receiving environment of the Byron STP for the extra sewage effluent that would be generated by development of West Byron. DoPE note that overload of the receiving environment has been an issue for landholders on the flow path from the STP to Belongil Creek, since sewage from the old South Byron STP was diverted to the current Byron STP a
